**MMI AWARDS IMAGING SOLUTIONS, INC. ITS *BEST IN SHOW*
AT 2003 MANAGED ACCOUNT SOLUTIONS_{SM} CONFERENCE**

Washington, D.C., October 22, 2003 – The Money Management Institute (MMI), the national organization for the separately managed account industry, awarded Imaging Solutions, Inc. its “Best in Show” award at its recently concluded fall conference. MMI selected Imaging Solutions from among 10 other vendors that exhibited or presented at its annual Fall Managed Account Solutions_{sm} Conference in New York. Imaging Solutions, Inc., based in Wallingford, Conn., is a leading provider of integrated document management systems that control image, data storage, and work flow functions.

The purpose of the Managed Accounts Solutions_{sm} conference is to offer senior executives in the SMA industry insight into operational issues affecting their ability to work efficiently with managed accounts. To complement this purpose – and to display some of the most interesting, state of the art services available in the SMA industry – the conference each year features “showcase presentations” of practical applications of new technologies and approaches to operating in the sector.

Last year MMI began awarding a “Best in Show” designation to the firm making the most outstanding showcase presentation. This designation is accompanied by permission from MMI to the award recipient to use a MMI trademarked logo on its sales/marketing materials for one year.

“Electronic imaging and workflow management have become key strategic considerations for a growing industry that increasingly is challenged to manage efficiently the high volume of paperwork associated with account oversight and reporting,” said Christopher L. Davis, Executive Director, MMI. “Conference attendees responded strongly to the presentation of Imaging Solutions’ approaches to this challenge, recognizing that as our industry continues to expand, state of the art documentation and record keeping processes will be an indispensable element of efficient account management and ongoing client satisfaction.”

“We are delighted and honored to have been chosen to receive the Best in Show award at this year’s MMI Managed Accounts Conference,” said Roger Tausig of Imaging Solutions. “We have been working for several years to evolve our back office solution for Operations Departments in the SMA industry. Winning this award validates that our vision of developing a much-needed technical solution that delivers operational efficiency across the board is on target. Receiving this type of recognition from the MMI’s Technology/Operations Committee further reinforces the value proposition that our solution affords to the users of our platform when they assess their needs to bring advanced technology to the back office for integrated document and data management and business processing automation.”

Approximately 400 managed accounts executives representing a little more than 170 firms attended the Managed Account Solutions_{sm} conference. A special “jury” composed of members of MMI’s Technology/Operations Committee evaluated and scored the presenting firms; their scores were the basis for the selection of Imaging Solutions as “Best in Show.”

Notes:

The Money Management Institute (MMI) is the national organization for the separately managed account industry, representing portfolio manager firms and sponsors of investment consulting programs. The MMI was organized in 1997 to serve as a forum for the separately managed account industry's leaders to address common concerns, discuss industry issues and work together to better serve investors. The Institute is the leading advocate for the industry on regulatory and legislative issues. The MMI's membership comprises firms that offer comprehensive financial consulting services to individual investors, foundations, retirement plans and trusts; related professional portfolio management firms, and firms that provide long term services to both sponsor and manager firms such as computer/technology firms. www.moneyinstitute.com

Imaging Solutions, Inc. is a provider of integrated document management systems utilizing scanning, optical disk storage, networked desktop computers and management software to control image, data storage, and work flow functions. Established in 1994, the company has pursued the imaging market as a systems integrator specializing in image processing, COM fiche replacement (C.O.L.D.), electronic forms processing, and internet/intranet-based applications. Imaging Solutions works exclusively with proven off-the-shelf technology that is capable of tightly integrating imaging with customers' existing data processing applications, platforms, and networking environments. www.imagingsolutions.com
